SUMMARY

B.Tech CSE fresher with hands-on internship experience building RAG pipelines, LLM integrations, and end-to-end AI systems. Proficient in Python, SQL, and ML frameworks with a strong foundation in data science and agentic AI.

EXPERIENCE

Uptoskill Technologies Private Limited <i>AI Intern</i>	Feb 2025 – May 2025
- Built a Retrieval-Augmented Generation (RAG) pipeline for real-world medical datasets, enabling contextual insight generation using LLMs. - Integrated LLM APIs with prompt engineering to develop scalable, accurate healthcare AI solutions. - Designed automated n8n workflows for data pipelines and system integration in AI-driven applications. - Performed feature engineering and preprocessing on unstructured clinical data to improve model accuracy.	

PROJECTS

AI-Based Hospital Discharge Automation System	Jan 2026
- Converted OCR-extracted clinical data into structured discharge summaries using RAG and LLM APIs. - Built FastAPI backend with role-based access, audit logging, and automated PDF report generation. - Integrated vector search with LLMs for context-aware, validated clinical output. <i>Tech Stack: Python, FastAPI, React, OCR, RAG, LLM APIs</i>	
RAG-Based Assessment Recommendation System	July 2026
- Scraped 377+ assessments, built FAISS embeddings for semantic retrieval, and integrated Groq LLaMA for reranking. - Deployed real-time recommendation interface using FastAPI and Streamlit. <i>Tech Stack: Python, FAISS, Groq LLaMA, FastAPI, Streamlit, NLP, Web Scraping</i>	
LLM-Powered Log Classification Framework	May 2026
- Designed scalable log classification pipeline using regex, semantic embeddings, and LLM inference. - Automated log analysis, significantly improving classification accuracy and reducing manual effort. <i>Tech Stack: Python, LLM, NLP, Embeddings, Scikit-learn</i>	

TECHNICAL SKILLS

Programming: Python, SQL
ML & DL: Supervised & Unsupervised Learning, Neural Networks, Model Evaluation
AI & LLM: RAG Pipelines, Prompt Engineering, LangChain, LangGraph, Hugging Face
Frameworks: PyTorch, Scikit-learn, NumPy, FastAPI
DBs: MySQL, Vector DBs
Visualization: Power BI, Streamlit
Tools: Git, GitHub, Jupyter Notebook

EDUCATION

Anurag University <i>Bachelor of Technology – Computer Science and Engineering</i>	Expected April 2026 <i>Hyderabad, India</i>
<i>Coursework: Python Programming, Data Structures & Algorithms, DBMS, Big Data Analytics, Machine Learning, Operating Systems — Seminar: Semantic Search using BERT/LLMs</i>	
Sree Vishveshwaraya Polytechnic <i>Diploma – Civil Engineering</i>	April 2023 <i>Deverkadra, India</i>

CERTIFICATIONS & ACHIEVEMENTS

Certifications	Achievements
- LangChain & LangGraph – LangChain Academy - SQL – HackerRank	50-day LeetCode streak badge - Solved 130+ Data Structures & Algorithms problems - Member of Placement Club - Participated in hackathon
